

# PERSONAL PROTECTION TEXTILES

## 40 suppliers of heavy duty fabrics

**Personal Protection Textiles: 40 suppliers of heavy duty fabrics** outlines the global market for personal protection clothing in the institutional, workwear and private sectors, and details the most important legislation, regulations and standards that govern their manufacture and use.

Featuring an overview of the personal protection equipment (PPE) industry and the wide-ranging use of textile materials involved in the protection of humans in a range of hostile environments, this new report explains the latest developments with regard to product areas and leading players, bringing together the key themes that are forecast to play a prominent role in future generations of personal protection textiles.

Written by internationally respected textile journalist Claudia Ollenhauer-Ries, this in-depth report, with around 200 pages and 50 tables, includes profiles of 40 leading global textile companies that supply speciality textiles for personal protection apparel. Some of these suppliers of heavy duty textiles are integrated manufacturers from spinning to weaving or knitting and finishing; others cover parts of the textile process.

## Personal Protection Textiles: 40 suppliers of heavy duty fabrics

Textiles for personal protection are designed to protect against heat, cold, fire, ultraviolet (UV) light, chemicals, micro-organisms, electrostatic charges and other threats. They include weatherproof and winter-proof clothing, cold-store clothing, equipment for rescue services, survival equipment, textile-reinforced armour, equipment for security services and the military, fire blockers, stab and ballistic protection, and respiratory protection

The second half of the 20th century saw a dramatic increase in the need for personal protection. The rise of health and safety requirements in the workplace has required the use of protective apparel for workers in many industries, while the threat of chemical and biological terrorist attacks, as well as natural pandemics, have become key political issues.

The range of physical, chemical and biological hazards and the means of combating them continue to increase and become more complex. This has led to the development and use of new textile fibres, fabrics and apparel constructions, which are designed to provide improved protection and safety, while maintaining comfort and efficiency.

### This new report will help you to identify:

- the current and future market for personal protection textiles
- key trends in the personal protection equipment industry
- principal drivers for personal protection textiles
- innovative materials and technologies – fibres, yarns and fabrics and their production methods
- future trends in personal protection textiles

The publication also includes a glossary of relevant technical terms.

### Company profiles

The report features 40 profiles of leading players in the personal protection textiles sector, including:

3M	Engtex	Mectex
Alok Industries	Eschler	Milliken
Ames Europe	Europrotect	Noiret
Andropol	FOV Fabrics	Norafin
Argar Technology	Gehring Textiles	Pro-Belting
Bafatex	GenTex	Safety
Bel Maille	W L Gore	Components
Blücher	Guardiantex	International
Boos	A W Hainsworth	Schoeller Textil
British Millerain	Heathcoat Fabrics	Sioen Industries
Burce	Ibena Protect	TenCate
Carrington Career & Workwear	IBQ Fabrics	Protective Fabrics
Concordia Textiles	Kermel	Textil
DuPont Safety & Protection	Kettelhack	Santanderina
	Klopman International	Thai Taffeta
	Lauffenmühle	Toray Industries

Publication date:  
May 2010
